Network Security – VPN

A corporate VPN is essential for modern businesses, offering robust security and seamless remote access. By encrypting data and creating a secure tunnel, it safeguards sensitive information from interception and unauthorised access — especially critical when employees work remotely or connect via public Wi-Fi. Beyond security, a VPN helps bypass geo-restrictions and supports compliance with data privacy regulations, ensuring your organisation meets global standards with confidence.

With easy-to-use controls and clear navigation, our Corporate VPN delivers a smooth, user-friendly experience — perfect for both IT veterans and those new to VPNs.

Corporate VPN: Secure, Compliant, and Remote-Ready

- **Instant Connectivity:**
  Skip the hassle our VPN comes with pre-configured gateways for immediate access. No complex setup, just plug in and go.
- **Cutting-Edge Security:**
  Safeguard your data with industry-leading protocols like WireGuard®, OpenVPN®, and advanced post-quantum encryption. Stay ahead of cyber threats with confidence.
- **Deployment Your Way:**
  Whether you want to install on your own server, choose a specific location, or let us manage everything our VPN adapts to your needs.
- **Secure Remote Access:**
  Empower remote teams to collaborate and access sensitive resources securely, no matter where they are.
- **Built for Compliance:**
  Meet global standards effortlessly. Our solution aligns with SOC 2 Type 2, GDPR, CCPA, and ISO 27001 requirements.
- **Smart Investment:**
  Get premium performance at a price that makes sense. High-quality protection without the high cost.

Key Features:

- **Intuitive Dashboard:**
  Effortlessly oversee your network with a streamlined admin console manage user registration, assign roles with precision, and maintain full control through role-based access settings.
- **Scalability:**
  Adapt with confidence scale your VPN infrastructure to match your organisation’s growth, ensuring peak performance and reliability at every stage.
- **Flexible Logging Options:**
  Customise your data retention strategy opt for zero logging to maximise privacy or enable comprehensive logs for detailed oversight, all tailored to your company’s compliance and operational needs.
- **Single Sign-On (SSO) & Multi-Factor Authentication (MFA):**
  Simplify and secure user access with seamless SSO integration across Okta, Google Workspace, and Microsoft Entra / Azure AD. Enhance protection with built-in MFA fully compatible with all major authenticators, ensuring frictionless login and robust identity verification.
